

- € We develop **sustainable technologies** to protect the environment. Our goal is to support our customers in **reducing CO2 emissions**.
- € Our valve development for hydrogen applications is an important building block on the **way to CO2 neutrality**.
- € Developments for the **Euro7 emissions standard** significantly support the **reduction of emissions from road traffic**. The emissions are reduced to such an extent that they are no longer environmentally relevant.
- € Our developments are used in all mobile applications, automotive, truck, off-road and marine. They help to increase the degree of effectiveness and efficiency and to significantly reduce emissions or prevent them entirely.
- € The goal of iTaz is to develop technologies that bring the **greatest benefit to people and the environment, economically and ecologically**. Saving resources and reducing emissions.
